Full Stack Java Developer | Spring Boot | Angular | Microservices

Summary

Full Stack Java Developer specializing in **Spring Boot, Angular, Microservices and Spring AI**. Experienced in building scalable backend systems and responsive web interfaces using **REST APIs, JWT-based security, Docker and cloud-ready deployments**. Strong background in **MySQL, PostgreSQL, CI/CD fundamentals and Agile/Scrum**, with hands-on experience delivering production-style applications.

Technical Skills

- **Languages & Frontend:** Java, JavaScript, SQL, Angular, HTML, CSS
- **Backend & Frameworks:** Spring Boot, Spring Core, Spring MVC, Spring Security, Spring Data JPA, Spring AI
- **Architecture, Databases & DevOps:** Microservices, RESTful Services, DTO-based Design, Layered Architecture, MySQL, PostgreSQL, Docker, CI/CD Fundamentals, AWS EC2 (Basics)
- **Tools:** Git, GitHub, Maven, JUnit, Postman, Eureka Server, Feign Client

Projects

DriveDock — Car Rental Management System (Microservices)

GitHub

- Designed and developed a Spring Boot microservices backend with **6 independent services** (User, Car, Booking, Owner, Payment, Notification).
- Built a responsive **Angular frontend** supporting vehicle search, booking workflows and user dashboards.
- Implemented and exposed **35+ REST APIs** for availability search, booking, cancellation and rental history.
- Enabled service discovery and inter-service communication using **Eureka Server and Feign Client**.
- Integrated **Spring AI** to generate booking summaries and automated customer-support responses, reducing manual handling by approximately **30%**.

HireSphere — Job Management Platform

GitHub

- Developed a full-stack job portal supporting **three user roles** (admin, employer, job seeker) using Spring Boot and React.
- Built and secured **25+ REST APIs** for job postings, applications, candidate tracking and employer workflows.
- Implemented DTO-based architecture and centralized exception handling, reducing validation and runtime errors by nearly **35%**.
- Designed and optimized relational schema with **8+ core tables** using Spring Data JPA and MySQL.
- Integrated **Spring AI** to generate job descriptions and application summaries, improving recruiter productivity by around **25%**.

ShopEase — E-Commerce Platform (Backend)

GitHub

- Developed Spring Boot backend services for managing product, order and order-item workflows.
- Implemented **20+ REST APIs** supporting product CRUD, order placement and order status tracking.
- Designed persistent data models for **6 core business entities** using Spring Data JPA.
- Integrated **Spring AI** to generate product recommendations and auto-generated order summaries.
- Improved code reuse and maintainability by reducing duplicated service logic by approximately **30%**.

Experience

Web Development Intern — BrainOvision (AICTE)

May 2023 – Jun 2023

- Developed responsive web pages using **HTML, CSS and JavaScript**.
- Collaborated with backend developers to integrate UI with REST APIs.
- Improved UI engagement by approximately **25%** through layout and interaction optimizations.

Education

Bachelor of Technology in Computer Science Engineering

Narayana Engineering College, Nellore, India

July 2025

CGPA: 8.6 / 10.0

Certifications & Achievements

- Runner – National Level Project Expo, Narayana Engineering College (2023)
- Runner-up – SAP Hackathon, Chalapathi Institute of Technology, Guntur (2024)
