

LIKITH NUTHALAPATI

likith.nuthalapati@gmail.com | +91 90XXXXXX21 | linkedin.com/in/likith-nuthalapati

Data Engineer with 3+ years of experience building scalable ETL pipelines and cloud-based data platforms. Skilled in Python, SQL, and Spark, with a strong focus on automating data workflows and improving pipeline reliability. Passionate about turning raw data into actionable insights that drive business decisions.

Skills

- **Programming Languages:** Python, SQL, Scala, Shell Scripting
- **Big Data Framework:** Apache Spark, Hadoop, Kafka
- **Data Pipeline Automation:** Apache Airflow, dbt
- **Database:** PostgreSQL, MySQL, MongoDB, Snowflake
- **Analytics:** Data Modelling, Data Warehousing, Power BI, Tableau
- **Cloud (AWS & Azure):** S3, EC2, Lambda, Glue, Redshift, Azure Data Factory, Databricks
- **Tools & Documentation:** Git, Jira, Confluence, Docker

Projects

Enterprise Data Warehouse Pipeline 2025

Scalable ETL Pipeline Development

- Designed and developed an end-to-end ETL pipeline using Apache Spark and Apache Airflow to process large-scale transactional datasets from multiple data sources.
- Automated data extraction, transformation, and loading into a centralized cloud data warehouse, improving data availability for analytics.
- Optimized Spark transformations and partitioning strategies, reducing pipeline execution time by approximately 35%.

Cloud Data Engineering

- Built cloud-native data pipelines using AWS S3, AWS Glue, Lambda, and Amazon Redshift.
- Implemented automated data ingestion workflows for batch processing and incremental data loading.
- Configured monitoring and alerting using Amazon CloudWatch to detect pipeline failures and improve system reliability.

Data Quality Analytics

- Developed automated data validation and quality checks to ensure data consistency before warehouse loading.
- Designed dimensional data models following Star Schema principles for business intelligence reporting.
- Created SQL-based analytical reports to support sales and operational decision-making.

Customer Analytics Data Platform 2024

- Developed Python-based ETL scripts to collect customer data from REST APIs, CSV files, and relational databases.
- Built automated workflows for cleaning, transforming, and loading datasets into PostgreSQL.
- Wrote optimized SQL queries, stored procedures, and views for reporting and dashboard applications.
- Created interactive dashboards using Tableau and Power BI to visualize customer behavior, sales trends, and operational KPIs.
- Implemented data validation rules and logging mechanisms to improve pipeline reliability and simplify troubleshooting.

Internship

Data Analyst Intern – Cloudverse Technologies Jan 2021 – Jun 2021

- Assisted in cleaning and preprocessing large datasets for internal analytics projects.
- Built introductory data pipelines using Python and Pandas, gaining hands-on experience with real-world data challenges.

Education

B.Tech, Computer Science – SRM Institute of Science & Technology Aug 2017 – Jun 2021

- Major in CSE | CGPA: 8.7
- **Major Project:** Real-Time Traffic Prediction using LSTM Networks
